

Cooee Bay Pool Refurbishment

- Project Description:** The project involves the refurbishment of the existing fifty metre pool and wading pool. The main pool shell will be renewed and converted to a 'wet-deck' system to repair an identified leak. The wading pool will be upgraded to include additional features. The refurbishment includes the replacement of the dosing, filtration and circulation systems for both pools.
- Reasons for Project:** The project will deliver a comprehensive refurbishment of the Cooee Bay pool facilities to address operational and compliance issues associated with the ageing infrastructure, and ensure that quality community swimming facilities continue to be provided. The upgrade will ensure that the facility meets the relevant State, National and international swimming body guidelines and competition standards.
- Benefits of Project:** The community will continue to have access to well-designed, high-quality aquatic facilities which support participation in physical activity through structured programs and active recreation. The upgrade will enable major swimming events (regional and state) to be hosted in Yeppoon
- Estimated Total Cost:** \$1.2 M
- Commencement Date:** August 2019
- Duration of Project:** Twelve (12) months
- Contact Officer:** Stuart Doak, Manager Infrastructure Projects
- Public Consultation:** Website, Facebook page, media publicity, signage at site
- Potential Interruptions:** The facilities being refurbished will be closed to the public during refurbishment. Every effort will be made to retain the remaining facilities open and accessible during this period.
