

YEPPOON LANDFILL

USING COUNCIL'S WEIGHBRIDGES FOR COMMERCIAL AND BUSINESS CUSTOMERS

The Yeppoon Landfill has dual weighbridges for entering the site and to exit the site and this will be used to record all waste disposed of at the site. Under State Government legislation, all waste must be recorded – there will be no exceptions for any customer.

When entering the “in” bridge, your driver will need to input the details of their vehicle registration and the waste being disposed of into the driver control station (DCS) on the weighbridge. The weighbridges are unmanned - there is an intercom button that can be pushed to contact the Gatehouse Operator in the domestic check in shed for guidance. Periodic spot audits will be conducted to ensure compliance with legislation.

For first time users of our weighbridge system, it is recommended the driver pulls up in the untarping area and walks over to the domestic check in shed to receive information on how to use the weighbridge system. The information in this brochure is to assist drivers with their use of the weighbridges and the correct data to input into the DCSs.

1. Enter the Yeppoon Landfill site and pull over in the untarping area which is located before and to the left of the incoming weighbridge. All drivers must untarp their loads at this point prior to using the weighbridge.

2. Drive onto the “in” weighbridge and enter the registration number of the vehicle.

3. Enter Account Code 96 to pay with Eftpos on exit or Commercial Account Holders can enter their account code.

Enter product code (the type of waste you are bringing in). Product codes are displayed on the sign on the end of the weighbridge and as well as on a sign attached to this driver control station (DCS).

4. Once the boomgate goes up, drive off the weighbridge and dispose of the waste in the correct disposal area. If in doubt, contact Site Supervisor on Channel 27 or the Gatehouse Operator on 4939 1809.

5. Once disposal is finished, drive back onto the "out" weighbridge and enter the registration number of the vehicle. If you are paying using a business account a docket will be produced from the slot. If you are paying the fee by debit/credit card using EFTPOS, use the EFTPOS machine (as circled in red below) as normal and collect the docket from the slot. If your transaction has been declined, please phone the Gatehouse Operator on 4939 1809 or use the call button on the DCS, they will lift the boom gate and get you to come over to the Domestic Check In shed to pay the appropriate fee before you leave the Landfill site.

Domestic Check In Shed is in the red circle above.

6. Disposal has now been completed so you may drive off the weighbridge.

All commercial/business drivers must use both the "in" and "out" weighbridges to dispose of waste legally.

If the driver exits the site without driving over the exit weighbridge this is classified as illegal dumping and Council's Local Law team will issue notices for this infringement.

Further information in relation to the Queensland Government Waste Levy and how it applies to businesses can be found at this site -

<https://www.qld.gov.au/environment/circular-economy-waste-reduction/disposal-levy/business/overview>

To save your driver/s time on the Landfill site consider opening an account by completing the Debtor Account Application for Landfill Disposal Account which can be found on Council's website or contact us on 1300 790 919.
